SUMMARY

I am an IT professional with over eight years of experience as both a Business Analyst and Systems Developer, currently working on initiatives on the Government Service Bus at Smart Zambia Institute in collaboration with the Ministry of Finance and National Planning.

EXPERIENCE

BUSINESS ANALYST & SYSTEMS DEVELOPER

Smart Zambia Institute

2024 - Present

Working at the heart of Zambia's digital transformation on the Government Service Bus initiative, collaborating with the Ministry of Finance and National Planning to bridge policy intent with practical implementation.

Gather and document detailed system requirements for national e-government services

Design scalable digital solutions aligned with operational and strategic objectives

Develop secure, user-friendly software systems for the Government Service Bus

Create comprehensive user manuals and conduct training for government staff

Champion feedback-driven improvements to streamline citizen access to digital services

Reduce service delivery times through efficient workflow analysis and optimization

CEO & FOUNDER

Pixel Pulse Studio

2018 - Present

Founded and lead a technology studio delivering end-to-end web and mobile solutions with scalable cloud architecture, clean API contracts, and automated CI/CD pipelines.
